intAct Race-Power

Starter batteries | wet charged
Completely maintenance free | calcium/calcium technology

No compromise for the new intAct Race-Power series either in terms of durability or in terms of the price-performance ratio.

intAct Race-Power batteries are completely maintenance-free, high-performance accumulators manufactured on the basis of the new calcium/cal-

cium 3DX grid technology. The use of eight different case sizes allows the replacement of up to 90 % of all common batteries. This has been made possible by constructing a battery with an improved performance of up to 15 % above the EN standard. These batteries are used for all common starter applications.

Battery	Volt	Capacity	Cold cranking amper	Purpose	Length mm	Width mm	Height mm	Position of terminal	Terminal	Hold down	Quantity
RP44	12	44 AH (c20)	420 A (EN)	53646, 53653, 54317, 54324, 54459, 54519	207	175	175	0	1	B13	
RP50	12	50 AH (c20)	450A (EN)	54459, 55010	207	175	190	0	1	B13	
RP60	12	60 AH (c20)	540 A (EN)	54519, 55046, 55427, 55559, 56077, 56111, 56219	242	175	175	0	1	B13

RP95	12	95 AH (c20)	800 A (EN)	58515, 58827, 58838, 59219, 60038, 60044	353	175	190	0	1	B13	

Product line: intAct Race-Power, 12 V starter batteries
Model: Calcium/calcium 3DX grid technology, completely sealed and maintenance free, double cover
Status: GUG = wet charged
Quality: OEM quality
Storage life: Storage life up to nine months

Charging voltage: Approved for charging voltage of up to 14.8 V
Cold start capacity: Higher cold start capacity in amps
Properties: Eight battery types cover 90 % of all passenger car batteries
Use: Passenger cars – trucks – agricultural machinery – tractors – buses – construction equipment
