

Eyelet adapter cable

suitable for intAct Chargebox CB-0.8 | CB-3.8 | CB-7.5

Art.Nr.

CB-OESE

Connection	M6 eyelet
Permanent connection	possible
Cable length	400mm
Suitable for working voltage	6V – 24V
Weight	60g

The ring eyelet cable is the ideal addition for intAct Chargebox chargers. It provides a secure and permanent connection to the battery - perfect for motorcycles, cars, boats and more. Thanks to fixed installation, reduced resistance and reliable contact, efficient and convenient charging is guaranteed at all times.

- » **Compatible** – suitable for use with the intAct Chargebox chargers CB-0.8 | CB-3.8 | CB-7.5.
- » **Versatile** – ideal for connecting to motorcycles, scooters, cars, boats and many other vehicles.
- » **Long-term connection possible** – the ring lug cable can remain attached to the battery for long periods or permanently.
- » **Safe** – the use of ring lug terminals significantly reduces the risk of unintentional slipping and the associated sparking at the battery terminals.
- » **Efficient** – a correctly fitted ring lug connection often has a lower electrical resistance than conventional alligator clips, which enables more efficient charging.
- » **Practical for batteries that are difficult to access** – particularly in vehicles or applications where the battery is difficult to reach, ring terminals offer the advantage that they can remain permanently fitted and the charger can be easily connected when required.
