

# intAct Traktion-Power PzS

Low-maintenance lead-acid battery with armoured plates | wet charged

Art.No.

## 06TP210

|                     |                            |
|---------------------|----------------------------|
| Volt                | 6V                         |
| Capacity            | 210 AH (c5), 270 AH (c20)  |
| CCR -18°C (EN)      | -                          |
| Electrolyte         | diluted sulphuric acid     |
| Electrolyte density | 1,28 +/- 0,01 Kg/l (25° C) |
| Size (LxWxH)        | 244 x 190 x 275 mm         |
| Weight              | 32,5 kg                    |
| Pos. of Terminal    | 0                          |
| Terminal            | 1                          |
| Base plate          | -                          |

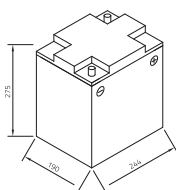

## Usage

### For heavy cyclical use

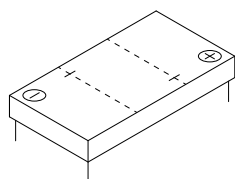

Given that the active material is armoured in tubes here, it can withstand the strongest cycles and exposure to shaking. An economical alternative, which also provides a permanently stable voltage due to its larger surface area. Our recommendation for all those who are looking for a particularly long-lasting battery to reliably power hobby applications.

- » **For heavy cyclical use.** 1,000 cycles according to IEC 254-1.
- » **Higher storage capacity** with the same battery size compared to grid-plate batteries.
- » **Tubular plate technology:** Robust and sophisticated for the heaviest loads.
- » **Particularly vibration-resistant.** Tubes protect the active material like a shield.
- » **Long service-life.** Durable, safe and reliable.
- » 6-volt and 12-volt versions.
